Professional Experience

Project Manager Operation Baker Hughes|| Hermes Trade S.r.l, Florence 2025 - Current

Project Management Operator with experience in the operational management of complex engineering projects in the Oil & Gas sector. Specialized in data analysis, cost control, and advanced Excel reporting, with strong support across the project lifecycle and cross-functional coordination. Results-oriented, with strong problem-solving skills and a solid understanding of strategic business processes.

- Support throughout the project lifecycle, from initial concept to final delivery (both Major and Minor projects).
- Development of advanced Excel reports (Pivot Tables, nested formulas, VLOOKUP, Power Query) for tracking KPIs, resource usage, and project costs.
- Monitoring and control of actual costs, planned costs, and resource allocation across multiple concurrent projects.
- Participation in project review meetings, cross-functional team calls, and meetings with engineering managers and stakeholders.
- Support in the creation and management of Enterprise Architecture, including system integration checks and technical troubleshooting.
- Collaboration with Project Management, Engineering, Finance, and Operations teams to ensure project alignment and budget compliance.
- Creation of custom Excel reports upon request by Project Managers to provide detailed cost tracking for departments involved in projects.
- Creation of custom VBA macros upon request by Project Managers to automate repetitive workflows and streamline operational efficiency across departments.
- Creation and maintenance of tasks and projects in Microsoft Project, including weekly progress calls with cross-functional teams to track project advancement and ensure timeline adherence.

IT-BI Specialist Celine Production || Hermes Trade S.r.l, Florence 2025 - Current

During my experience at Celine (LVMH Group), I provided support to the IT and Business Intelligence teams, offering both technical assistance and functional consultancy across various internal departments. I actively collaborated with the French team on BI solution development and helped optimize data flows to ensure data consistency and quality for business use.

- Inventory management: use of JD Edwards (Oracle) to perform updates and adjustments to Celine's inventory database.
- IT and business support: technical and functional assistance to internal departments to solve issues and improve business processes.
- Business Intelligence consulting: support in developing and optimizing Power BI reports and dashboards based on business logic.
- Collaboration with the French team: regular interaction with Celine's headquarters in France for analysis, development, and clarification of business requests.
- Data flow monitoring: continuous supervision of data pipelines to ensure information coherence, accuracy, and availability for business needs.
- Dashboard troubleshooting and maintenance: prompt identification and fixing of issues to ensure data reliability and a smooth user experience.
- Data quality control via GCP: querying and verifying data on Google Cloud Platform to ensure its reliability and alignment with official sources.
- Support for PLM system and data migration: operational and technical coordination of tasks related to the migration of the PLM system and associated data.
- Debugging and application fixing: analysis and resolution of errors or malfunctions during and after system migrations or upgrades.
- Application control and validation: checking that all applications and data have been correctly mapped and operate properly from one system to another, intervening if discrepancies arise.
- Complete ticket management via ServiceNow: full support in handling technical assistance tickets (opening, managing, resolving, supporting) and ongoing communication with the French team for any modifications or escalations via ServiceNow.
- Development of technical reports and workflow documentation as HTML/CSS web pages for internal and external users.

Technician Provisioning S3K Security of Third Millenium, Rome 2024

The professional manages provisioning for Fastweb, checking network coverage and resource availability. They plan and coordinate activations with technicians, configuring routers and modems, including remote setups. They handle the activation of telephone and internet lines, conducting tests to verify functionality. They manage support tickets to resolve provisioning issues and delays.

- Coverage and Availability Check: Check network coverage and the availability of resources needed to provide the requested service.
- Activation Planning: Coordinate and plan activations with field technicians, ensuring all resources are ready.
- Device Setup: Configure routers, modems, and other necessary devices for service delivery, often remotely.
- Line Provisioning: Configure and activate telephone and internet lines using automated and/or manual systems, setting the necessary technical parameters.
- Functionality Testing: Execute tests to verify that services are active and functioning according to established standards.
- Support Ticket Management: Respond to support tickets related to provisioning issues, such as activation delays or technical problems.

Data Engineer Gucci Casellina, S3K Security of Third Millenium, Firenze 2022/2024

The BI professional provides technical support on Tableau Server and Desktop, managing the maintenance and development of virtual dashboards. They use DBeaver to resolve issues reported by users and handle Front End problems through the Kering Connect ticketing system. They monitor Back End flows to ensure data security and collaborate with clients to optimize the dashboards.

- **Tableau Expertise:** Use and knowledge of Tableau Server and Desktop for maintenance and development of virtual dashboards.
- **Data Querying:** Utilization of DBeaver for querying views linked to various virtual dashboards to fully resolve user-reported issues.
- **Front End Management:** Management and resolution of Front End problems on virtual dashboards through the Kering Connect ticketing platform.
- **Front End Development:** Front End Development and editing on Tableau for clients.
- **Data Security Monitoring:** Monitoring Back End flows to ensure data security and integrity.
- **Client Communication:** Communication with clients, holding meetings to discuss modifications and resolve dashboard issues.
- **Sales and KPI Knowledge:** Knowledge of sales and KPIs, familiar with luxury retail sales processes and corporate KPIs.
- **Excel Data Manipulation:** Excel Data Extraction, skilled in extracting and manipulating data in Excel.

IT Technician, EDP Florence, Florence 2021/2022

IT Technician specialized in managing and maintaining corporate infrastructure, configuring systems (PostgreSQL, Apache Tomcat on Linux), ensuring data security, performing backups, and providing hardware/software support.

- **Device Configuration:** Configuration of PCs, smartphones, and tablets, including connecting peripherals such as printers and tablets.
- **Data Management Procedures:** Definition of standard procedures for data archiving, backup, and recovery.
- **Network Setup:** Setup of internet and intranet networks, along with configuration of email servers.
- **Hardware Repair:** Execution of hardware repair interventions in case of anomalies.
- **Maintenance Management:** Management of hardware and software maintenance interventions.
- **Malfunction Resolution:** Resolution of malfunctions and restoration of full device functionality.
- **System Installation Updates:** Basic updates on the installation of PostgreSQL and Apache Tomcat using Linux.
- **IT Consultancy:** Consultancy in selecting the most suitable IT tools and technologies based on needs.
